

MoRivCC Capital Expenditures Plan

Thanks to generous donations from our community, MoRivCC currently owns the following equipment:

- One video editing computer
- Two High Definition video cameras, with tripods and batteries
- One 16-channel audio recording fire wire mixer
- One 18.5–inch, I-7 laptop computer for audio recording and editing
- One color inkjet printer with DVD labeling capability

MoRivCC hopes to expand our activities of recording and archiving the work of Missouri River regional artists. To achieve this, we need the following equipment for our remote recording sessions:

- Two High Definition video cameras with tripods and high capacity batteries, \$4,000 each
- Audio/Video Switcher with intercom (Datavideo HS-2000 Studio in a case), \$7,280
- Three quality microphones with stands and cables, \$225 each

In our office/editing site, we need:

- An additional video editing computer, \$1500
- An office computer, \$500

To achieve our mission we also use borrowed equipment that is not always reliable or totally compatible with the MoRivCC equipment. The quantity and quality of future recordings will increase as we acquire the needed equipment.

You can help support and expand our efforts to record and archive the work of regional artists by donating quality audio and video recording gear or helping us purchase compatible equipment.

Donations to MoRivCC are tax deductible. MoRivCC is federally registered as a 501C(3) tax exempt organization. See morivcc.org for details.
